

CUBE LABS

The BIOHEALTH Gear Box Alliance (BIO-ALL) project

BIO-ALL, a project for students in Biohealth/Entrepreneurship

BIO-ALL is a project funded under the Erasmus+ Programme, which aims at developing innovative approaches, providing entrepreneurial skills to academics and business professionals, to stimulate entrepreneurship and facilitate the exchange and co-creation of educational tools and knowledge.

BIO-ALL - BIOHEALTH Gear Box Alliance- was born from the need to develop specific post-graduate programs in the Biotech and Health (BIOHEALTH) sectors, designed to bridge the gap between the offer of university curricula and the skills required by the business world.

This is why the ground-breaking International Joint Acceleration Programme was created, for students in the BIOHEALTH/Entrepreneurship sector who want to develop and bring to market an idea they had during their training.

In Italy, the co-leader of the programme is the start-up accelerator Cube-Labs. The programme will start in June 2021. It is intended for all those who want to expand their training in BIOHEALTH/entrepreneurship, tracing a winning path and bringing their idea to the market.

The calls for seed companies in the BIOHEALTH sector who wish to participate will start in January 2021: the winner, in addition to participating in the course, will have access to a prize of € 5 000.

The 15 selected-seed companies will be part of an extensive acceleration program, including *kick of day*, an immersive training week in entrepreneurship in the field of *BIOHEALTH*, physical incubation, an exclusive mentoring program with a trained mentor and workshops.

Which are the areas that are part of the BIOHEALTH sector?

Biotechnology, medicine, ICT, pharmaceutical industry, medical devices, chemistry.

The 13 partners involved in the project and coming from 4 European countries will provide mentorship in each strategic area of the programme.
